ANNUAL REPORT

HOSPITALS DIVISION

DEPARTMENT OF PUBLIC HEALTH
PROVINCE OF ALBERTA

J. D. CAMPBELL, M.Com. (Queen's), F.C.A., R.I.A.,
EXECUTIVE DIRECTOR

ANNUAL REPORT

OF THE

ALBERTA HOSPITALIZATION BENEFITS PLAN

1964

August 16th, 1965.

TO HIS HONOUR, J. PERCY PAGE,
Lieutenant Governor of the Province of Alberta.

SIR:

I have the honour to transmit herewith the Annual Report of the Hospitals Division of the Department of Public Health for the year 1964.

I have the honour to be, Sir,

Your obedient Servant,
J. DONOVAN ROSS, B.A., M.D.,
Minister of Health.

INTRODUCTION

This report covers the calendar year 1964 which is the sixth complete year of operation of the Alberta Hospitalization Benefits Plan.

The information presented in this report indicates that the hospital plan has progressed to meet the normal increase in demand for hospital services and facilities arising from an increase in population and changes in medical science. Co-operation between and among the various partners operating under the plan continued at a high level and in certain respects reflected an improvement over the previous years.

The provincial government expresses its appreciation to all those persons whose efforts are reflected in the results portrayed in this report, not only in the provision of patient care but also in the effective utilization of available funds.

1. ADMINISTRATIVE RESPONSIBILITY

The responsibility of the Hospitals Division is tied in with the creation of the federal-provincial hospital plan and was set out specifically at the time when the Hospitals Division was made a separate division in the Department of Public Health.

The duties and powers of the Hospitals Division include the approval of location and construction of hospitals; the determination, approval and maintenance of adequate standards of service rendered within a hospital; the provision of consulting services involving the operation of the hospital to the extent and at such times as it is considered necessary; the inspection and supervision of hospitals; the paying of hospitals for insured services and the approval of rates; the approval of hospitals; the administration and enforcement of the Alberta Hospitals Act and Regulations; and the administration of the Agreement with the Government of Canada respecting contributions under The Hospital Insurance and Diagnostic Services Act (Canada).

Basically the administrative responsibilities of the Hospitals Division cover those matters which are involved in those costs that are hospital costs reimbursable by the provincial government through the Hospitals Division.

The titled head of the Hospitals Division is the Executive Director who is directly responsible to the Minister of Health for the operation of the Division involving the interpretation and administration of policy decisions which have been established by legislation and matters of detailed policy established through the Minister by the Executive Council.

In order to carry out its responsibilities a committee form of organization has been established within the Hospitals Division.

The Executive Committee which has been established is comprised of seven members of the Hospitals Division including B. H. Foster; J. A. Hogan; M. J. Hunchak; E. Mather; A. H. McLean; A. J. Nykoly; L. H. Protti; who act in a consultative capacity to the Executive Director on all matters concerning the Division

including recommendations to the Minister of Health on matters of policy.

In addition to the work of the Executive Committee each of the members have specific responsibility for certain aspects of the work carried on within the Division. Although responsibilities are assigned for the general operation of the specific areas, committees have been established governing the more specific aspects of the plan, particularly in the fields of hospital facilities, equipment purchases, cost analysis, preparation of the Annual Report and such other temporary committees as may be required in order to meet specific problems. The utilization of the committee form of organization is also designed to provide a means of dissemination of information within the whole organization in order that a more effective co-ordination of activities might be achieved. In the operation of the various committees the work of the Executive Director has been designed from the standpoint of providing co-ordination.

A liaison committee comprised of members of the College of Physicians and Surgeons and the Hospitals Division, has been established to discuss matters of mutual concern. The use of this type of liaison with professional groups interested in hospital matters serves a useful purpose not only in communication but also in effective performance. In 1965 it is expected that this type of liaison will be used to a greater extent with other groups.

In 1964 the cost of administration has been maintained at about the same level in relation to the total expenditures of the plan as has existed in previous years.

The major increase in cost of administration is accounted for mainly by salary increments. Because of the flexible form of organization of the Division, only a minimum increase in staff has been necessary even though the auxiliary hospital program has continued to expand, population has increased and a nursing home care program was implemented.

Tables 1 and 2 set out the experience in this respect.

TABLE 1: HOSPITALS DIVISION—COST OF ADMINISTRATION

	FISCAL YEARS ENDED MARCH 31st				
	1961	1962	1963	1964	1965
Total Cost of Administration of Hospitals Division	\$ 160,702	\$ 202,930	\$ 215,652	\$ 239,785	\$ 273,261
Total Expenditures of Hospitals Division	\$44,507,757	\$48,261,646	\$53,164,361	\$60,598,086	\$69,555,658*
Per Cent Administration Costs of Total Expenditure36%	.42%	.41%	.39%	.39%
Residents Covered Under the Plan	1,272,000	1,321,000	1,358,000	1,393,000	1,420,000
Cost of Administration per Eligible Resident	13¢	15¢	16¢	17¢	19¢

*Does not include construction grants of \$3,629,667.00, an appropriation that came under hospital division administration during the year.

Miscellaneous				
TOTAL	\$202,930.41	\$215,652.19	\$239,785.34	\$273,261.19

2. CHANGES AND POINTS OF INTEREST IN THE PLAN

During the year 1964 there was a continued development of programmes started in previous years. This was particularly evident in the auxiliary hospitals with improved rehabilitation and physio-therapy services and in the expansion and renovation of general hospitals. Although it is difficult to evaluate the inter-relationship between the general and auxiliary hospital programmes, there is distinct evidence of improvement of patient care from the standpoint of availability of beds and from the more specialized aspects of care which are provided.

The opening of the Glenrose Provincial General Hospital in Edmonton in January 1964 provided specialized convalescent care along with a Multiple Handicapped Children's Unit for the medical care and education of multiple handicapped children between the ages of 5 to 17 years. During the year the number of beds available in this hospital gradually increased and by the end of the year provided substantial relief to the number of patients needing convalescent care.

The presentation of the final report of the Custodial Care Survey Committee in December 1963 resulted in the implementation of the Alberta Nursing Home Plan on April 1, 1964. This new programme is administered by the Hospitals Division and details of the first nine months of operation are provided in a separate annual report published in March 1965. It is too early to properly assess the affect of the Nursing Home Plan on the demand for beds in general and auxiliary hospitals, but there is a clear indication that the Nursing Home Plan is filling a much needed place in relation to these other facilities.

On March 1, 1964, the interpretation of electrocardiograms, electroencephalograms and electromyograms was included as an insured service for in-patients under the hospital plan. Although the inclusion of this service had been resisted by the Provincial Government

it was included at the insistence of the Federal Government to comply with the Federal/Provincial Agreement and agreed to by the College of Physicians and Surgeons in Alberta.

In the examination of the bed situation in Alberta much concern has been indicated about the operation of uneconomical hospitals and although several reports have been made about this problem it was still under discussion at the end of the calendar year 1964. Hospital costs and the method of payment to hospitals is of continued significance with the development of the Plan. Procedures have been designed to relieve the financial pressures as well as to provide a more realistic pattern of disbursement to hospitals in relationship to the various factors which exist. In making the final settlement in the year 1964 an attempt was made to give consideration to specific features existing in individual hospitals as well as to provide hospitals with funds sooner than they received them in prior years.

An important step in the provision of a high standard of patient care was made during the year by the Division giving approval for the enrolment of general hospitals in the Professional Activities Study Programme operated by the P.A.S. Commission in Ann Arbor, Michigan. Twenty-one general hospitals comprising almost sixty percent of total general hospital patient days took advantage of the programme by December 31st, 1964. It is expected that by the end of 1965, the remainder of the general hospitals will enroll, making it possible to eliminate certain statistical reports now submitted by hospitals to the Hospitals Division.

During 1964 preliminary work was done in developing a computer-oriented indices programme. It is expected that under this programme hospital administration will be provided with a more effective administrative tool for carrying out these functions which are the responsibility of the hospital. The indices programme will take the place of the cost tables which have been provided by the Hospitals Division for the various hospitals. This programme will be in operation for the year 1965.

3. INSPECTION SERVICE

The Hospital Inspection section of the Hospitals Division serves as the principal field representative of the Division. At December 31st, 1964, the inspection staff consisted of three inspectors with formal training and actual experience in hospital administration, a registered nurse with post graduate training in teaching and supervision and a clerk with a background of accounting and auditing.

The pattern and number of inspection visits to hospitals varies from year to year, depending on the nature and extent of situations in the hospitals which appear to warrant inspection visits, and the extent and urgency of the work carried out by members of the inspection staff within the Hospitals Division office.

During 1964, forty-two hospitals were visited on a routine inspection basis by teams of inspectors, accompanied by the clerk or by the clerk and the registered nurse. During these visits, the inspectors review the administration of the hospital, the organization and operation of the nursing and other services, the utilization of equipment for which reimbursement has been made to the hospital by the Hospitals Division, and the apparent need for items of equipment for which reimbursement has been requested but on which no decision has yet been given. In addition, an examination is made of the documents and records of the hospital pertaining to claims for reimbursement for bad debt losses, and pertaining to the eligibility of patients for benefits under the plan.

When possible, the inspection teams during their routine visits to hospitals, endeavour to contact personally and interview the chairman of the hospital board, and the president of the medical staff, in addition to the administrative officials of the hospital.

Memoranda are made of the visits for use within the Hospitals Division. Where conditions are observed which appear to require the attention of the hospital board, they are drawn to the attention of the board chairman by letter.

In addition to the 42 hospitals receiving general inspection visits, thirty-two were visited by the registered nurse and fourteen others were visited in relation to specific items or problems.

A survey was made of five hospitals built to the model plan developed for thirty-bed hospitals, to determine on the basis of their experience problem areas in the model plan and in the initial equipment. The recommendations made on the basis of the survey, resulted in some modification of the model plan.

In addition to work in the field, the staff of the inspection section participate in the general activities within the Division, including the work of the various internal committees, project development, instruction and representation.

4. FINANCING THE ALBERTA HOSPITALIZATION BENEFITS PLAN

A. Operational Costs

The cost of hospitalization benefits provided under the Alberta Hospitals Act is shared by the patients, the municipalities, the Province of Alberta and the Federal Government.

The amounts and proportions in which costs under the Plan have been shared during each of the past five years is shown in Table 3.

The patient's share of the cost represents the co-insurance charges, except when paid by the province for pensioners and other classes of patients, and in respect to bad debt allowances to hospitals. The utilization of hospitals by persons paying co-insurance remains substantially the same as in 1963. The reduction in the proportionate share of costs borne by patients is due to the co-insurance rates remaining the same whereas the overall total cost of hospitalization has increased.

The municipalities' share of the cost of the plan has been set at the equivalent of a levy of four mills on an equalized assessment. The substantial increase in 1964 reflects the adjustment which was made in 1964 in respect to the equalized assessments. The rate of four mills was not adjusted, with the result that the contribution by the municipalities as well as the proportionate

TABLE 3: SHARING OF THE COSTS OF THE ALBERTA HOSPITALIZATION BENEFITS PLAN

	1960		1961		1962		1963		1964	
	\$	%	\$	%	\$	%	\$	%	\$	%
Patient's Share	3,724,201	8.0	3,900,505	7.4	4,673,887	8.5	4,884,602	7.7	4,848,102	6.8
Municipal Share	6,289,033	13.5	6,589,310	12.6	7,068,729	12.8	7,250,000	11.4	9,997,298	14.1
Provincial Government Share	18,406,803	39.5	21,204,531	40.4	19,971,282	36.2	24,461,964	38.5	25,759,325	36.2
Federal Government Share	18,200,794	39.0	20,758,781	39.6	23,490,820	42.5	26,930,000	42.4	30,545,200	42.9
Total	46,620,831	100.0	52,453,127	100.0	55,204,718	100.0	63,526,566	100.0	71,149,925	100.0

share of the total cost of hospitalization, has increased. The amount shown in Table 3 does not include excess costs or unapproved costs for which municipalities, as owners of the hospital, are liable, and this detailed information is presented in the section covering the Financial Analysis of Hospitals.

The share of costs borne by the Province of Alberta is a residual share and reflects changes in the overall cost of the plan as well as changes in the relationship that the shares borne by patients, by municipalities and by the Federal Government, bear to the total cost. In addition to the cost of the plan shown in Table 3 the province paid certain related costs which are shown in Table 4.

The amount of the Federal Government contribution is computed on the basis of the amount of shareable cost in Alberta, coupled with the average level of shareable costs throughout Canada. Certain costs paid by the plan are not shareable with the Federal Government nor is the patient's share. The proportion of the Federal contribution to the total cost of the plan is affected by the extent of these non-shareable costs.

Although the Federal contribution represents 42.9% of the cost of the Plan in 1964, non-shareable items including the amount of the co-insurance charges represent 16.79% of the total cost in 1964, compared to 19.1% of the total cost in 1963 and 17.2% in 1962. In relationship to shareable costs less co-insurance charges, the Federal contribution decreased from 52.4% in 1963 to 51.9% in 1964.

Computed on the same basis as the national per capita costs, the cost of insured in-patient hospitalization in Alberta in 1964 was \$45.22 (\$41.07—1963) compared with an estimated average per capita cost for Canada of \$43.73 (\$39.27—1963). Although higher than the national average, the cost level per capita in Alberta is increasing at lower rate than in Canada as a whole. From 1959 to 1964, the average per capita cost of insured in-patient charges in Canada increased by \$19.08 or 77.4%. For Alberta the increase was \$16.37 or 56.7%.

B. Other Hospitalization Costs

Certain costs for hospital services are not covered by the Plan and these costs become the responsibility of the patients, the owners of the hospitals and other parties.

The portion of the cost which is the patient's responsibility represents amounts which are payable personally or on their behalf by governmental and insuring agencies.

The owners' responsibility represents amounts which are ultimately met by the Municipalities, either as owners or through agreement with the owners of hospitals. The section on the Financial Analysis of the hospitals for 1964 highlights the owners' responsibility

in the operation of the hospitals. Although excess operating costs still exist in the Alberta Hospitalization Benefits Plan and become the financial responsibility of the owners of the hospital, these are insignificant in respect to the number of hospitals and the amount of money involved. See information provided in the Appendix for details of excess costs for the calendar year 1964.

TABLE 4: OTHER HOSPITALIZATION COSTS

	1963	1964
1. Patients' Responsibility		
(a) Patients not eligible for benefits		
Non-residents	\$ 836,236	\$ 930,496
Patients covered by Workmen's Compensation Act	999,310	1,044,738

Provincial Grant to match\$15,765,421.79

Total construction grants paid—Federal and Provincial\$31,530,843.58

C. Hospital Construction

Financing hospital construction is shared by the federal government and the provincial government. A summary of the method of financing was included in the 1963 Annual Report.

The federal allocation of hospital construction grants to Alberta for 1964 amounted to \$1,514,399. This amount, which was distributed to hospitals on the basis of \$2,000 per bed for hospital beds and \$750 per bed for living quarters for nurses or interns, was matched by the province. Construction of hospitals and nurses' living quarters continued at such pace that the federal construction grant applied on the above basis was insufficient to cover all approved new construction. The federal grant is available for renovations of hospitals, but since the grant was insufficient for all new construction, no portion of it was used for renovations.

The province administers the construction grants making payment to hospitals and then claiming reimbursement from the federal government. When the federal construction grant is depleted, the province continues to pay hospitals for construction in the same amount as if federal grants were available and claim reimbursement from the federal government when and if recurring grants become available. Payments made by

the province for approved projects and for which no federal funds were allotted as of March 31, 1965, amounted to \$507,875 for general hospitals and \$1,380,710 for mental hospitals.

During 1964, only one general hospital of 25 beds and 6 bassinets was built, resulting in a net increase of 10 beds and 1 bassinet. Completed construction of auxiliary hospitals during the year provided 700 beds and resulted in a net increase of 627 beds. Construction of nurses' residences provided 342 new beds—(net increase 338)—see Table 6.

In addition to the above there were under construction or in various stages of planning 3,508 general hospital beds (net increase 2,467), 225 auxiliary hospital beds (net increase 225) and 505 nurses' residence beds (net increase 280)—see Table 7. This will ultimately mean a 28.5% increase in general hospital beds and a 11.2% increase in auxiliary hospital beds.

The percentage increase in hospital beds will exceed the forecasted percentage increase in population resulting in increased availability of hospital beds and services particularly in metropolitan areas. It is expected that approvals required during the next five years will be reduced, mainly for improvement or replacement of existing facilities.

5. FINANCIAL ANALYSIS

Part I

Source and Application of Funds

(See Tables in Appendix—Financial Analysis for Approved General and Auxiliary Hospitals)

GENERAL

The Provincial Government accepts the basic responsibility for hospital operations and construction. However, to the extent that the provincial government does not assume unlimited responsibility, this portion becomes the responsibility of the owners. A financial analysis of the flow of funds in the hospitalization field was made for the calendar year 1964 and was directed primarily to the establishment of the extent of owner's responsibility for this period.

As hospital operations are carried on under different types of ownership, it was considered advisable to segregate the analysis as between (a) municipal owners, (b) voluntary owners (c) provincial government. Municipal and provincial government owners have access to a public source of funds whereas this is not so for voluntary owners. Provision is made in The Alberta Hospitals Act for co-operative action between the voluntary owners and municipalities in meeting the problem of the owner's financial responsibility, but to date this provision has not been used. The financial analysis made resulted in factual financial data representing the position as it applies to the calendar year 1964.

I. MUNICIPAL HOSPITALS

A. Approved General Hospitals

The financial analysis for 71 municipal approved general hospitals for the calendar year 1964 indicates the following requirements for funds which are the financial responsibility of the owners.

Increase in working capital	\$ 734,710	
Land improvements	5,502	
Unapproved costs of operations	86,020	
Medical expenses re municipal doctors....	23,147	\$ 849,379
Excess costs of operation	682,787	
		<u>\$1,532,166</u>
Less:		
Revenue which remains with the owners		
Interest and donations	51,077	
Ancillary operations	4,604	
Collection of prior plan accounts	1,470	57,151
		<u>\$1,475,015</u>
Less:		
Decrease in accounts receivable from the Provincial Government arising from an improvement in payment procedures (Note 1)		346,614
Tax requisitions made on municipalities		<u>\$1,128,401</u>

Note 1: Complete information is not available as to excess capital costs which represent an owner's responsibility and which would correspondingly increase this figure.

B. Auxiliary Hospitals

The financial analysis for 18 municipal auxiliary hospitals for the calendar year 1964 indicates the following requirements for funds which are the financial responsibility of the owners:

Working capital increase	\$ 252,689	
Unapproved costs of operation	30,112	
Land improvements	104,257	\$ 387,058
Excess costs of operation	52,410	
Excess capital costs (Note 2)	21,523	73,933
		<u>\$ 461,321</u>
Less:		
Revenue which remains with the owners		
Interest and donations		10,867
		<u>\$ 450,454</u>
Less:		
Decrease in accounts receivable from the Provincial Government arising from an improvement in payment procedures (Note 3)		82,975
Tax requisitions made on municipalities		<u>\$ 367,479</u>

Note 2: Complete information is not available as to the excess capital costs. In all likelihood, this figure is understated.

Note 3: To the extent that item under Note 2 is understated, this figure is also understated.

II. VOLUNTARY HOSPITALS

A. Approved General Hospitals operated by Catholic Orders

The financial analysis for 30 Catholic operated approved general hospitals for the calendar year 1964 indicates the following requirements for funds which are the financial responsibility of the owners:

Increase in working capital	\$ 184,694	
Land improvements	1,662	
Unapproved costs of operations	6,192	\$ 192,548
Excess costs of operation		51,164
		<u>\$ 243,712</u>
Less:		
Revenue which remains with the owners		
Interest and donations	\$ 44,546	
Collection of prior plan accounts	16,324	60,870
		<u>\$ 182,842</u>
Less:		
Excess funds re capital expenditures over actual expenditures made during 1964	\$ 401,315	
Less:		
Increase in accounts receivable from Provincial Government representing the setting up of claims before they are payable by the Provincial Government	324,823	76,492
Owner's responsibility		
Owner's contribution	\$ 106,495	
Less: loss on ancillary operation....	145	<u>\$ 106,350</u>

B. Approved General Hospitals operated by Voluntary Groups other than Catholic Orders

The financial analysis for 4 voluntary approved general hospitals operated by other than Catholic Orders for the calendar year 1964 indicates the following requirements for funds which are the financial responsibility of the owners:

Increase in working capital	\$ 75,432	
Unapproved costs	3,176	\$ 78,608
Excess capital costs		15,089
		<u>\$ 93,697</u>
Less:		
Revenue which remains with the owners		
Interest and donations	\$ 107,509	
Collection of prior plan accounts	743	108,252
		<u>\$ 14,555</u>
Less:		
Increase in accounts receivable from Provincial Government representing the setting up of claims before they are paid by the Provincial Government		14,555
Owner's responsibility		<u>\$ Nil</u>

C. Auxiliary Hospitals

The financial analysis for 6 voluntary auxiliary hospitals for the calendar year 1964 indicates the following requirements for funds which are the financial responsibility of the owners:

Unapproved costs of operation	\$ 344	
Excess costs re construction	21,492	\$ 21,836
Less:		
Decrease in working capital	18,911	
	\$ 2,925	
Less:		
Revenue which remains with the owners		
Interest and donations	3,072	
	\$ 147	
Less:		
Increase in accounts receivable from		
Provincial Government represent-		
ing the setting up of claims before		
they are paid by the Provincial		
Government	18,574	
Owner's responsibility		
Owner's contributions	\$ 18,427	

III. PROVINCIALY OWNED HOSPITALS

A. Approved General Hospitals

The financial analysis is for three provincially owned hospitals for the calendar year 1964, namely University of Alberta Hospital, Glenrose Provincial Hospital, which were operating in 1964, and the Foothills General Hospital, which was still under construction.

The financial analysis, unlike that for other hospitals, reflects substantial amounts involved in respect to the Foothills General Hospital. The Provincial Government has the financial responsibility of an owner and, therefore, accepts the responsibility for working capital requirements, excess costs of operation, and capital over and above the statutory limits set for reimbursement in the area of capital and operations, unapproved costs and miscellaneous items not considered as being covered under the hospitalization plan.

FINANCIAL ANALYSIS

Part II

Balance Sheet Position

(See Tables in Appendix—Financial Analysis for Approved General and Auxiliary Hospitals)

GENERAL

An analysis of the audited financial statements of all approved general and auxiliary hospitals in Alberta as at December 31st, 1964 has been made to provide factual information of the financial aspects involved in the hospitalization program in Alberta. The information has been set up under the headings of municipal, voluntary and provincial.

The analysis shows that changes in owner's equity was attributable to the provincial government assuming:

- (1) responsibility for the debt repayment of all acceptable debt outstanding against the hospitals at 1st January 1959 and any long term debt incurred subsequent to that date,
- (2) responsibility for the outright payment for the purchase of major and minor equipment made by the hospitals from 1st January 1959,

- (3) responsibility for outright construction grants for new construction, and the yearly depreciation charges recorded by the hospital. In any given year, the increase or decrease in the owner's equity in part reflects the excess or deficiency in the provincial grants to the depreciation recorded.

On 1st April 1958, when the Alberta Hospitalization Benefits Plan was introduced, hospitals had rather substantial amounts of outstanding receivables from patients. As these accounts were collected, the hospitals were provided with free funds which placed their working capital in a more favorable liquid position. Since the plan subsequent to that date met their operating costs, this favorable position overall has continued to exist. A comparison to the working capital position of the new municipally owned auxiliary hospitals, which came into being after 1st January 1959, indicates this to be the situation. Also, many municipal hospital boards expecting expansion or replacement of their facilities requisitioned to meet this responsibility. This resulted in a more favorable working capital position when, in January 1959, the province assumed these responsibilities.

I. MUNICIPAL HOSPITALS

A. Approved General Hospitals

The combined balance sheets of 71 municipal approved general hospitals as at 31st December 1964, reflect a net working capital position of \$4,228,154 which, coupled with a net fixed capital of \$23,538,775, provides an owner's equity of \$27,766,929.

The analysis of the change in the owner's equity during the year indicates the erosion of the equity since the depreciation provided during the year was in excess of the grants provided by an amount of \$317,006. The Source and Application of Funds Statement indicates an expenditure on buildings during the year in the amount of \$256,582 in comparison to the amount of depreciation provided on buildings in the amount of \$1,505,762, as recorded in the audited financial statements. The decrease in accounts receivable from the provincial government of \$346,755 resulted in an improvement in the liquidity of the working capital position in this group of active treatment hospitals during the calendar year 1964.

B. Auxiliary Hospitals

The combined balance sheets of 18 municipal auxiliary hospitals as at 31st December 1964, reflects a net working capital position of \$149,200 which, coupled with a net fixed capital of \$8,356,217, provides an owner's equity of \$8,505,417.

Although, as previously stated, the accounts receivable from the province has decreased, the decrease for this group amounts to \$82,975 and tends to improve the liquidity of the working capital position; however, the amount of the bank loans still exceeds the bank balance. The responsibility rests with the municipalities for providing the necessary working capital. During 1964 the net bank position of these hospitals improved by \$227,014 through tax requisitions made upon municipalities.

The analysis of the change in the owner's equity during the year indicates an excess of grants paid over the depreciation provided amounting to \$2,587,422. The Source and Application of Funds Statement indicates an expenditure on buildings of \$2,718,807, in comparison to the amount of depreciation provided on buildings in the amount of \$268,992, as recorded in the audited financial statements. This shows the degree of activity in the initial auxiliary hospital building program from its implementation in 1959 to its culmination in 1964.

II. VOLUNTARY HOSPITALS

A. Approved General Hospitals operated by Catholic Groups

The combined balance sheets of 30 approved general hospitals owned and operated by Catholic groups as at 31st December 1964 reflect a net working capital position of \$1,993,381, which, coupled with a net fixed capital of \$15,589,633, provides an owner's equity of \$17,583,014, which includes capital contributions by the province since 31st March 1958. The debt which was not assumed by the province, amounting to \$1,245,756, is included as part of the owner's equity.

The accounts receivable from the provincial government as previously indicated has increased \$324,823 and has resulted in a reduction of the liquidity of the working capital. The bank position indicates a net amount of \$1,164,298 and current liabilities exclusive of bank loans of \$1,158,291.

The analysis of the change in the owner's equity during the year indicates an excess of grants paid over the depreciation provided amounting to \$1,053,089. The Source and Application of Funds Statement indicates an expenditure on buildings of \$2,647,214, in comparison to the amount of depreciation provided on buildings in the amount of \$660,558, as recorded in the audited financial statements. This shows the degree of building activity in this group of hospitals as compared to that of the municipal group of active treatment hospitals.

B. Approved General Hospitals operated by Voluntary Groups other than Catholic Orders

The combined balance sheets of four approved general hospitals owned and operated by voluntary groups other than Catholic groups as at 31st December 1964, reflects a net working capital position of \$692,405 which, coupled with a net fixed capital of \$3,238,985, provides an owner's equity of \$3,931,390, which includes capital contributions by the provincial government since 31st March 1958.

The accounts receivable from the province as previously indicated has increased \$14,555, reducing the liquidity of the working capital position. The bank and investment position indicates \$869,515 and current liabilities of \$387,224. The Source and Application of Funds Statement indicates a decrease in the bank balance of \$10,784 for the year, and temporary investments have increased by \$126,504.

The analysis of the change in the owner's equity during the year indicates an erosion of the equity because the depreciation provided during the year was in excess of the provincial grants by an amount of \$21,749. The Source and Application of Funds Statement indicates expenditure on buildings during the year of \$301,762, in comparison to the amount of depreciation provided on buildings in the amount of \$47,877, as recorded in the audited financial statements.

C. Auxiliary Hospitals

Although the auxiliary hospital program was essentially a municipal program, certain voluntary auxiliary hospitals that were already established were allowed to continue under the program.

The combined balance sheets of six voluntary auxiliary hospitals as at 31st December 1964, reflect a net working capital position of \$190,606, which, coupled with a net fixed capital of \$2,386,568, provides an owner's equity of \$2,577,174, which includes capital contributions by the province since 31st March 1958.

The accounts receivable from the provincial government, as previously indicated, has increased \$18,574 reducing the liquidity of the working capital position. The source and application of funds indicates a decrease in bank for the year of \$31,049.

The analysis of the change in the owner's equity during the year indicates an excess of grants paid over the depreciation provided amounting to \$53,025. The Source and Application of Funds Statement indicates an expenditure on buildings of \$103,745, in comparison to the amount of depreciation provided on buildings in the amount of \$122,491, as recorded in the audited financial statements.

III. PROVINCIALY OWNED HOSPITALS

A. Approved General Hospitals

The combined balance sheets of three approved general hospitals, including the Foothills Hospital which is under construction, as at 31st December 1964, reflects a net working capital position of \$2,677,196 which, coupled with a net fixed capital of \$23,627,164, provides an owner's equity of \$26,304,360.

The accounts receivable from the provincial government has increased \$239,041 and has resulted in a reduction of the liquid position of the working capital. The net bank position of \$1,662,869 and investments of \$1,627,613 together are greater than the current liabilities of \$2,842,326.

The analysis of the change in the owner's equity during the year indicates an excess of grants paid over the depreciation amounting to \$3,425,718. The Source and Application of Funds Statement indicates an expenditure on buildings of \$9,665,878, in comparison to the amount of depreciation provided on buildings in the amount of \$193,216, as recorded in the audited financial statements.

GENERAL SECTION

6. HOSPITALS OPERATING UNDER THE PLAN

A summary of the different types of institutions under the Plan as at December 31, 1964, the number of beds and the volume of patient care, by responsibility for payment is given in Tables 8 and 9. The diagram on Page 16 presents a pictorial view of the different types of institutions.

During the year 1964 as the auxiliary hospital programme expanded and the new nursing home plan came into being it became possible to terminate the contracts

of the remaining 23 nursing homes which had been providing service under the auxiliary hospital programme. There were 913 beds in the 23 nursing homes whose contracts were discontinued but some of them were then contracted under the nursing home plan. Details are given in the 1964 Annual Report of the Alberta Nursing Home Plan.

Beulah Home, Edmonton, a contract hospital providing maternity hospitalization, ceased operations as at March 31, 1964.

**All contracts with nursing homes providing auxiliary hospital care were terminated in 1964. Volume of care data represents services up to date of contract termination.

7. PAYMENTS MADE BY HOSPITALS DIVISION

Table 10 presents the details of expenditure made for the calendar years 1960 to 1964.

In 1964 the total expenditure by the province through the Hospitals Division amounted to

\$66,812,786, an increase of 11.7% over 1963. This does not include construction grant payments and payments made to nursing homes under The Nursing Homes Act or the costs of mental and tuberculosis institutions operated by the province.

TABLE 10: BREAKDOWN OF PROVINCIAL EXPENDITURES THROUGH THE HOSPITALS DIVISION ON HOSPITALIZATION SERVICES, HOSPITAL EQUIPMENT AND CONSTRUCTION FOR EACH OF THE CALENDAR YEARS 1960, 1961, 1962, 1963 and 1964

Type of Payment	1960	1961	1962	1963	1964
General Hospitals:

8. PAYMENT OF CO-INSURANCE CHARGES BY HOSPITALS DIVISION

During 1964 the Hospitals Division continued to pay co-insurance charges in respect of certain categories of patients. The amount paid during 1964 totalled \$691,647 as against \$701,891 in 1963. Comparative experience for 1963 and 1964 is given in Table 11.

TABLE 11

PATIENT DAYS FOR WHICH CO-INSURANCE WAS PAID BY HOSPITALS DIVISION DURING 1963 and 1964

9. THIRD PARTY LIABILITY

Where a person has received hospitalization benefits under the Alberta Hospitalization Benefits Plan and is legally entitled to recover costs and damages from others for injury caused by negligence or other wrongful act, the province under provision of The Alberta Hospitals Act recovers all or part of the cost of hospitalization provided.

During 1964 the hospitals reported over 3,200 accident admissions which resulted in 1,452 new files being created. The 751 files that were finalized during the year resulted in a recovery of \$239,695 and left as unsettled 1,717 cases, some dating back to 1958.

The following table presents the comparative experience for the past five years.

TABLE 12
COMPARATIVE EXPERIENCE OF THE THIRD PARTY LIABILITY NET RECOVERIES

Year of Recovery	Number of Claims Paid	Total Net Recovery
1960	414	\$ 83,749.00
1961	587	140,948.00
1962	610	155,312.00
1963	647	156,339.00
1964	751	239,695.00

10. OUT-OF-PROVINCE HOSPITALIZATION

Table 13 gives comparative information for the years 1960-1964 about payments made by the hospital plan for residents admitted to hospital outside Alberta. Tables 14 and 15 give the reasons for residents being

away from Alberta and the places in which they were located at the time hospital care was provided.

Details of the utilization by Alberta residents of the Lloydminster Hospital, which is owned jointly by Alberta and Saskatchewan municipalities, is shown separately.

TABLE 13: COMPARATIVE EXPERIENCE IN OUT-OF-PROVINCE HOSPITALIZATION

	1960	1961	1962	1963	1964

14. Other Countries	38	524
Total Adults and Children	3,835	32,929

Particulars of Insured Hospitalization Provided to Alberta Residents by the Lloydminster (Saskatchewan) Hospital During 1964 were as follows:

	Adults and Children	Newborn
Number of cases	1,492	206
Days of Care	14,897	1,494
Average Stay	10.2	8.2
Total Payments by Alberta	\$253,566.08	

11. TRENDS IN RATED BED CAPACITY AND UTILIZATION

A historical summary of supply of hospital beds in Alberta and their utilization is presented in Table 16. The table indicates comparative experience for each of the type of institutions operating under the Alberta Hospitalization Benefits Plan. In calculating the various rates, revised inter-censal estimates of population have been used for the years 1952 to 1960. Inter-censal population estimates for the years 1962 to 1965 are subject to revision after the 1966 population census.

The supply of approved general hospital beds per 1,000 population increased from 5.9 in 1963 to 6.0 in 1964, but the supply of approved auxiliary hospital beds increased at a higher rate from 1.0 to 1.4 beds. During the year there was some increased utilization of approved general hospitals as days of care per 1,000 population increased from 1,687 in 1963 to 1,712 in 1964. Patient-days in approved auxiliary hospitals per 1,000 population amounted to 373 in 1964 as compared to 312 in 1963. With the termination during 1964 of all remaining contracts with contract nursing homes, there was a decrease of patient-days per 1,000 population in contract nursing homes from 228 in 1963 to 118 in 1964. The total patient-days in all institutions per 1,000 population showed a net decrease from 2,417 in 1963 to 2,381 in 1964.

During the year the implementation of the Alberta Nursing Home Plan, providing domiciliary and personal care, resulted in some shift of patient load from general and auxiliary hospitals, in the same fashion as the earlier implementation of the auxiliary hospital programme had assisted in reducing some pressures upon general hospital beds. It is estimated by the use of actual admission-discharge information that the Alberta Nursing Home Plan reduced pressure upon hospital beds to the extent of approximately 50 days per 1,000 population in 1964.

TABLE 16: HISTORICAL SUMMARY BY TYPE OF HOSPITAL—NUMBER OF BEDS AND UTILIZATION IN RELATION TO POPULATION

Year	Census or Inter-Censal Estimates of Alberta Population	Rated Bed and Bassinet Capacity December 31		Beds and Bassinets Set Up December 31		Beds and Cribbs Difference December 31		Rated Beds & Cribbs Increase over Previous Year		Rated Bed and Crib Capacity As At December 31 per 1,000 Population	Patients per Bed per Year	Occupancy Based on Rated Capacity Beds and Cribbs	Adults and Children Rates per 1,000 Population			Average Length of Stay

12. PREVALENCE OF DISEASE AND FREQUENCY OF OPERATIONS

Table 18 presents comparative information by primary diagnosis for patients separated from general and auxiliary hospitals during 1964. The information in this table is a summary of the more detailed information which appears in the Appendix.

Table 19 lists the 25 most frequent primary operations performed in active treatment hospitals during 1964. The operative procedures are listed in order of frequency during 1964 and in each instance are accompanied by comparative information for 1962 and 1963. It will be noted that there has been a general increase in rates per thousand population for most of the operative procedures.

The diagram on page 20 indicates graphically the number of separated patients in each diagnostic grouping and the percentage in each group that underwent operative procedures.

The two color maps on the following pages present the frequency of hospitalization and operations in relation to population in each coding zone square, or other areas as outlined on the maps. The map dealing with frequency of operative procedures has had excluded those obstetrical operative procedures not performed in operating rooms, whereas these were included in the previous year. Table 17 gives average experience for

the areas classified on the basis of the population of the largest urban centre in the area.

TABLE 17
AVERAGE FREQUENCY OF HOSPITALIZATION AND OPERATIONS
IN RELATION TO POPULATION IN VARIOUS AREAS ON THE
ACCOMPANYING MORBIDITY MAPS BY SIZE OF LARGEST
URBAN CENTRE IN AREA, 1964

Provincial Average in Outlined Areas of Accompanying Maps Containing:	RATES PER 1,000 POPULATION

Urban centres of 1,000 - 2,499 population	275.3	76.4
Urban centres of 2,500 - 4,999	269.7	80.1
Urban centres of 5,000 - 99,999 population....	217.3	84.9
Urban centres of 100,000 population and over....	147.1	65.7
Provincial Average	197.7	69.8

13. SEPARATIONS AND DAYS BY AGE, SEX AND LENGTH OF STAY

Table 20 presents comparative information for acute and long-term hospitals in regard to separations and days, analyzed by age, sex and length of stay. The differences in age distribution and length of stay in the two types of institutions are of particular interest in analyzing the patterns of hospitalization in the Province of Alberta. The accompanying diagram on page 21 is a graphical presentation of certain of the aspects presented in Table 20.

TABLE 18: PRIMARY DIAGNOSIS OF SEPARATED PATIENTS FROM GENERAL AND AUXILIARY HOSPITALS, 1964

**Excludes Newborn

(1) Includes provincial residents in approved general and contract hospitals and provincial plan beneficiaries in federal and out-of-province hospitals.

(2) Includes provincial residents in approved auxiliary hospitals and provincial plan beneficiaries in contract nursing homes and Colonel Belcher Chronic Unit. Excludes 327 separations with total of 4,865 days stay for whom information was incomplete at time of compilation.

RATES OF PATIENT DAYS OF SEPARATIONS PER 1,000 POPULATION IN EACH AGE GROUP PROVIDED IN ACTIVE TREATMENT HOSPITALS AND IN LONG TERM HOSPITALS

Days per 1,000
population
in each age group.

**APPROVED GENERAL HOSPITALS
AND
APPROVED AUXILIARY HOSPITALS**

14. GROSS EXPENDITURE—OPERATING COSTS

Table 21 presents the cost experience of approved general hospitals for the years 1950 through 1964. Comparison of 1964 to 1963 shows that the gross expenditure yearly increase was \$5,762,164 for 1964 against \$5,497,842 for 1963. Salaries increased \$3,811,820 in 1964 against \$3,755,962 for 1963. Salaries during 1964 represent 63.6% of the gross expenditure of all hospitals.

Tables 22 and 23 present comparative cost experiences of General and Auxiliary Hospitals for the years 1964 and 1963. The percentage increases and the costs per patient days are presented by type of expenditure (except that unit food costs are expressed as meal day costs rather than patient day costs).

Inference could be made that the increase in 1964 general hospital costs were due primarily to increase in price levels. A review of utilization of hospitals' services indicates the following volume changes.

	Beds	Bassinets
1964 Rated Bed Capacity	8,572	1,563
1963 Rated Bed Capacity	8,349	1,570
	+ 223	— 7
	<hr/>	
	Adults and Children	Newborn
1964 Days of Care	2,444,853	241,963
1963 Days of Care	2,364,067	259,355
	+ 80,786	—17,392
	<hr/>	
	Adults and Children	Newborn
1964 Patients under care	281,671	36,075
1963 Patients under care	271,862	38,314
	+ 9,809	—2,239

The percentage increase of costs of auxiliary hospitals is 37.9 for 1964 as against 23.8 for 1963 and the percentage increase on a patient day basis is 13.7 as against 11.2 for 1963.

Depreciation included in the table is as reported by the hospitals and therefore is not necessarily determined on a uniform basis.

TABLE 21
APPROVED GENERAL HOSPITALS

15. PERSONNEL AND PAID HOURS OF WORK

Table 24 reports numbers of staff employed in hospitals as at December 31, 1964 by category of personnel. This information is used as reported by the hospitals and does not include federal and contract hospitals or nursing homes, nor does it include personnel employed outside of the hospital field.

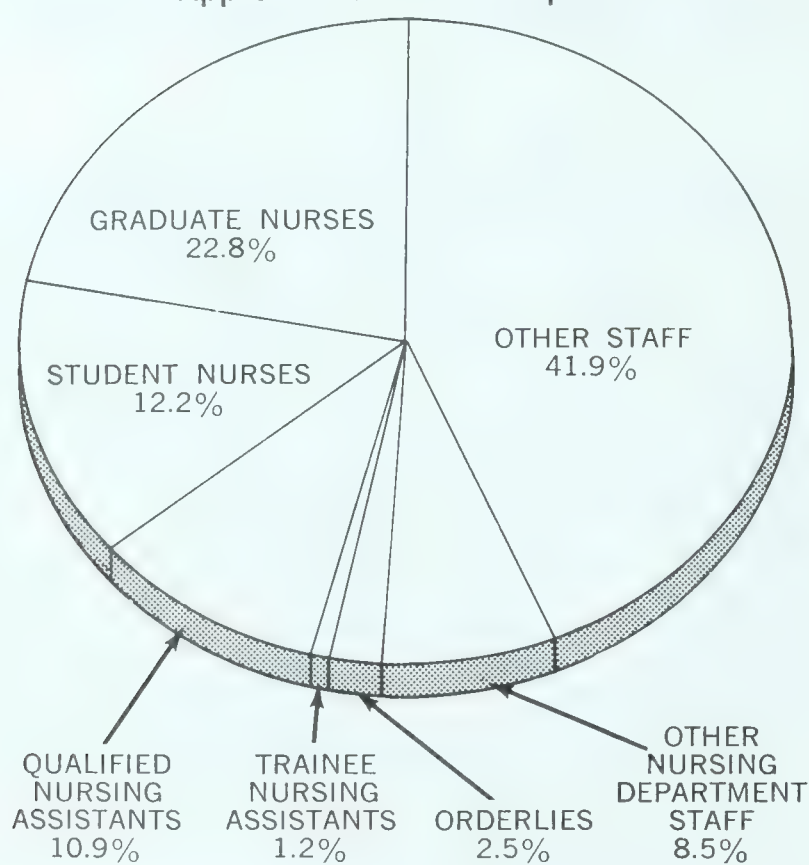

Slight changes in definitions used in the annual statistical return completed by hospitals has resulted in some adjustment in numbers of specific types of personnel in relation to the figures of previous years. This includes such categories as Pathologists and Radiologists who are now counted as staff only if they perform the major portion of their duties on the hospital premises. "Other Special Service Department Personnel", inter alia, includes certain personnel previously reported by hospitals as "Combined Laboratory and Radiology Technicians". A shift of laboratory students from hospitals to the Northern Alberta Institute of Technology has resulted in some decrease of numbers of personnel reported in the hospitals.

Total numbers of staff in general hospitals amounted to 13,838 full-time and 1,221 part-time personnel, as compared to 13,318 and 1,029, respectively, in the previous year. In auxiliary hospitals there were 1,395 full-time staff and 376 part-time staff as compared to 1,031 and 248, respectively, in the previous year.

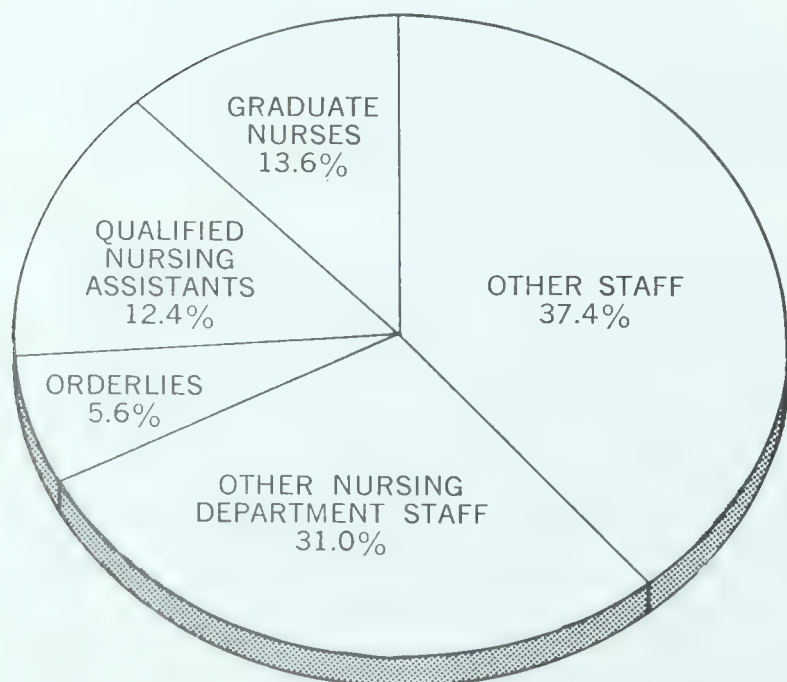

Table 25 presents a summary of hours of work by department in the two types of hospitals. It will be noted that average total hours per patient in general hospitals increased to 12.2 from 12.0 in 1963. Similarly, average total hours per patient day in auxiliary hospitals increased from 5.4 in 1963 to 5.6 in 1964.

16. LABORATORY SERVICES

Table 26 presents a summary of volume of laboratory services to in-patients and out-patients during each of the years 1960 to 1964. During 1964, the upward trend of the past five years continued as units of service per patient and per patient-day increased to 29.4 and 3.4 respectively.

Table 27 analyzes laboratory work referred out by hospitals in 1964.

More detailed information, by individual hospital is presented in the Appendix. It will be noted in the Appendix that there is considerable variation in the proportion of total work load referred out by the individual hospital.

TABLE 26

18. SURGICAL SERVICES

A summary of selected information on surgical services in general hospitals for the years 1960 to 1964 is given in Table 29. There was a slight increase in average time per operation and in the rate post-operative infections, while the rate of post-operative deaths showed a slight decline. Detailed information for each hospital is presented in the Appendix.

TABLE 29

SURGICAL SERVICES IN GENERAL HOSPITALS

Item	1960	1961	1962	1963	1964

19. OBSTETRICAL SERVICES

Table 30 presents selected summary information of obstetrical services in general hospitals for the years 1960 to 1964 inclusive. It will be noted that there was a sharp decrease in number of deliveries and births from 1963 to 1964. Detailed information by individual hospital is given in the Appendix.

TABLE 30

OBSTETRICAL SERVICES IN GENERAL HOSPITALS

Item	1960	1961	1962	1963	1964
